I just got my COVID-19 vaccine!
What's next?

About the Johnson & Johnson (Janssen) vaccine:

You just received your COVID-19 vaccine. The vaccine is **at least 85%** effective at preventing serious illness from COVID-19. **Want to learn more? Aim your smartphone's camera at this QR code to download the Fact Sheet.**

After vaccination:

After you get the shot, you will be asked to stay for 15-30 minutes to monitor for reactions, which are rare. *Many people will have no side effects. Some may experience:*

- Pain or swelling at the injection site
- Headache
- Chills
- Fever (usually less than 100.4° F)

Call your doctor if the arm in which you got the shot feels worse after 24 hours or if your side effects do not go away after a few days.

The vaccine can't give you COVID-19.

Be sure to keep your vaccination card for your records.

TIP: *Take a picture of your vaccination card with your smartphone for safekeeping in case you misplace it.*

COVID-19 VACCINE

Enroll in V-safe, a new smartphone-based, after-vaccination health checker for people who receive COVID-19 vaccines. Go to vsafe.cdc.gov OR aim your smartphone's camera at this QR code.
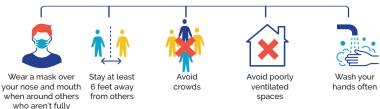

Women younger than age 50 should be aware of a slightly increased risk for a rare but serious blood clotting disorder. Most people who developed these blood clots and low levels of platelets were females ages 18 through 49 years and symptoms began one to two weeks following vaccination.

The chance of this occurring is remote. You should seek medical attention right away if you have any of the following symptoms after receiving Johnson & Johnson COVID-19 vaccine:

- Severe or persistent headaches or blurred vision
- Shortness of breath
- Chest pain
- Leg swelling
- Persistent abdominal pain
- Easy bruising or tiny blood spots under the skin beyond the site of the injection

IMPORTANT: Even though you have received the vaccine, experts say to still follow these recommendations to protect yourself and others:

Wear a mask over your nose and mouth when around others who aren't fully vaccinated

Stay at least 6 feet away from others

Avoid crowds

Avoid poorly ventilated spaces

Wash your hands often
